👤 Profile

I'm a developer and product manager with ten years experience creating engaging experiences for web and mobile. I started a freelancer cooperative and built dozens of apps for clients. Now I'd like to join a great team and create world-class products there.

💼 Employment history

Founder at Co-op Consultancy, New York
2014 – Present

The co-op designs and develops high-quality applications for web and mobile. I created the organization for myself and friends to have better freelancing careers.

- Created 48 frontend and backend applications using Python, Ruby, JS, and other languages
- Designed UX and delivered wireframes based on user testing and lean design processes
- Managed projects with average budgets of $55,000 and average team sizes of 4 members

Recent Work:

- Lada (2018) - wrote backend, created UX, and managed 5-member team for mindfulness-focused dating app in NYC
- WRKR (2017) - wrote frontend, created UX, and managed 2-member team for private Uber service built on behalf of the largest pizza franchise owner in US
- Level Solar (2016) - wrote frontend, created backend API, and managed 3-member team for sales operations of the largest solar installer in NYC area

Software Developer Fellow at EngageSPARK, Philippines
2014

Created REST API in Python for Y-Combinator backed global marketing startup.

Software Development Mentor at RampUp, Boston
2013

Guided adult students through four-month course in Python and web development.

Software Developer at Testive, Boston
2012

Created features in Python and JS for Techstars-backed education startup.

🎓 Education

Boston College, Bachelor of Science in Finance and Information Systems, Boston
2008 – 2012
