 BROOKLYN, NY

Profile

I'm a software developer and product manager with nearly ten years' experience creating engaging experiences for web and mobile. I started a freelancer cooperative and built dozens of apps for clients. Now I'd like to join a great team and create world-class products there.

Employment history

Founder at Co-op Consultancy

2013 – Present

The co-op designs and develops high-quality applications for web and mobile. I created the organization for myself and friends to have better freelancing careers.

- Recruited and managed 50+ development and design freelancers
- Created frontend and backend applications in Python, Ruby, and JS
- Designed wireframes based on user testing and directed agile development teams

Work examples:

- Lada (2018) - mindfulness-focused dating app
- WRKR (2017) - private Uber service for US's largest pizza shop owner
- Level Solar (2016) - largest solar installer in NYC area

Software Developer at EngageSPARK, Philippines

2013

Created REST API in Python for Y-Combinator backed telecom and SMS marketing startup.

Software Development Mentor at RampUp, Boston

2013

Guided adult students through four-month course in Python and web development.

Software Developer at Testive, Boston

2012

Created frontend and backend features in Python and JS for Techstars-backed education startup.

Education

Bachelor of Science in Finance and Information Systems, Boston College, Boston

2008 – 2012
